

READY TO OPTIMIZE YOUR IRON ORE AND CONCENTRATES TRADING?

Streamline your operations with
ENTRADE®.

ENTRADE®: THE COMPLETE SOLUTION FOR IRON ORE AND CONCENTRATES

ENTRADE® empowers your business by simplifying every aspect of iron ore and concentrate trading, from contract management to inventory tracking and risk control.

With a single integrated platform, ENTRADE® provides real-time insights and flexible pricing models to help you control costs, reduce risks, and make fast, informed decisions for greater profitability.

PRODUCT AND COST CONTROL

ENTRADE® helps manage product specifications, warehouse expenses, and shipping costs seamlessly. Whether mining, transporting, or refining, ENTRADE® adapts as markets shift, providing visibility into positions, costs, and production values—empowering you to optimize every operation.

INFORMED DECISION-MAKING

ENTRADE® unifies views across traders, risk managers, and logistics, enabling timely, effective decisions. Flexible specification and pricing models let you price contracts accurately, minimize risks, and streamline settlements and invoicing.

RISK MANAGEMENT AND VISIBILITY

ENTRADE® offers precise risk tracking with advanced pricing formulas and decomposition tools. Gain full visibility into positions, P&L, and inventory quality, helping control exposures and maintain strong portfolio performance.

ENTRADE®: TOTAL CONTROL FROM FRONT TO BACK OFFICE

ENTRADE® offers a full-spectrum solution for iron ore and concentrate trading, covering contract management, risk assessment, and inventory tracking. Automate and integrate processes across departments for error reduction and a clear, consolidated view of your trading operations—allowing for fast, data-driven decisions and enhanced profitability.
