

READY TO ENHANCE YOUR LNG TRADING?

Gain full control with ENTRADE®.

ENTRADE®: THE COMPLETE SOLUTION FOR LNG

ENTRADE® empowers LNG operations by simplifying workflows, enhancing cost tracking, and providing comprehensive risk management across every stage of the lifecycle.

With ENTRADE®, streamline trading, reduce manual processes, and make data-driven decisions faster. Purpose-built for LNG, ENTRADE® enables you to respond quickly to market shifts, improve efficiency, and drive profitability—all from a single, integrated platform.

EFFICIENT LNG AND NATURAL GAS MANAGEMENT

ENTRADE® provides ready-to-use tools for tracking costs and logistics across LNG stages, giving you control over every detail. Built for natural gas and LNG, ENTRADE® reduces complexity, improves accuracy, and frees you to focus on growth.

SIMPLIFIED AND ACCURATE DEAL ENTRY

ENTRADE® streamlines deal entry with pre-configured pricing formulas, minimizing manual input and errors. Reference key indexes like Brent, WTI, TTF, and JKM, and rely on automated calculations for accurate, efficient pricing.

OPTIMIZED TERM PRICING AND SCHEDULING

With ENTRADE®'s advanced curve engine, manage term pricing, set custom formulas, and adjust delivery schedules in one platform. This flexibility helps maximize profitability, accurately value trades, and respond to market demands.

ENTRADE®: TOTAL CONTROL FOR LNG TRADING

ENTRADE® covers the complete lifecycle of LNG trading, from production through delivery, providing a single platform to handle logistics and financial risks.

With ENTRADE®, benefit from a consistent, centralized system that enhances operational efficiency and ensures reliable, profitable trade management.

MIDDLE OFFICE

Seamless scheduling and inventory tracking

Accurate deal volumes and position management

Automated lifting schedules and confirmations

Boil-off and heel management to minimize risk

Consistent risk monitoring for secure operations

FRONT OFFICE

Negotiating and recording deals to streamline processes

Automated volume and cost calculations for accuracy

Integrated risk monitoring to manage exposure

Real-time analytics with mark-to-market valuations

Option pricing models to assess and manage risk

BACK OFFICE

Automated settlement calculations and invoicing

Comprehensive P&L attribution and reporting

Seamless payables and receivables management

LNG contract evaluations with FX and interest risk coverage

Flexible delivery terms management for optimized logistics
